

Blazing Angels Software Restore Guide

Document Part #: 040-0169-01 Rev. B

The operating system and game software are provided on a single DVD labeled **System & Game Install Disk**.

Important: When you use the System & Game Install Disk, you will erase all game settings, statistics, and collections data stored in the game software. It is advisable to contact Technical Support before using the Disk to resolve a problem.

Perform the following steps to restore software:

1. Insert the disk in the DVD-ROM Drive and power cycle the game. When the game reboots the computer will automatically read the disk and begin copying files and configuring the hard drive.
2. When prompted, remove the disk and power cycle the cabinet.
When the computer reboots, it will continue to install and set up the software. When it finishes, it will automatically reboot again and bring up the **Calibrate Stick Test** screen.
3. Calibrate the joystick and throttle as described in your *Operation & Service Manual*.
4. Set the sound volume levels, pricing, and other Operator settings from the Operator Menus.
5. Exit from the Operator Menus and play a game to verify proper operation.
