

PRODUCT: EA SPORTS™ PGA TOUR® GOLF Cabinets
ISSUE: Two Versions of Golf Computer Exist; Each Requires Specific Software

BULLETIN: SB-007
DATE: 10/19/2004

We recently started using a new computer motherboard and video card for EA SPORTS™ PGA TOUR® GOLF Cabinets. As a result of this change, we now have two versions of the Emergency Recovery Disk.

You must check your computer and use only the correct version of the Emergency Recovery Disk when restoring your operating system. **If you use the wrong Emergency Recovery Disk, the game will not work.**

The easiest way to determine which configuration you have is to look at the audio ports on the back of the computer. Refer to the table below for specific information.

<p>For Computers with THIS Rear Panel</p> <p>USB & Ethernet Ports at Top</p> <p>Audio Ports Vertical</p>	<p>Use THIS Emergency Recovery Disk Emergency Recovery Disk: Version 08.26.2003, OS XPE Nvidia Geforce 4, Part # 050-0024-01, Rev B</p> <hr/> <p>Use THIS Game Disk Version Championship III: 2.2.0.x or 2.2.2.0</p> <p>Important: For Conversion Kit Systems with this computer and a Universal Video Converter (UVC) board, use only Game Disks version 2.2.0.x.
