

EA SPORTS™ NASCAR® Racing Track & Team Update Installation Instructions

Document Part #: 040-0199-01

Follow these instructions to install the Track & Team Update (Software Version 1.5) on your cabinet. Please keep these instructions in case you need to reinstall the software in the future.

Total Update takes about 20 minutes.

Important: Cabinets running this new software (Version 1.5) will not link to cabinets running previous versions.

Important: When you run the System Recovery Disk, you will erase all game settings, statistics, and collections data stored in the game software. Write down anything you want to remember before beginning the procedure.

Install the Game Dongle

1. Remove the back door from the cabinet
2. Remove the USB Game Dongle from the system computer, and insert the new Game Dongle from the kit in the same USB Port.
3. **Please return the old dongle to GLOBAL VR for recycling:**

Mail dongles to: Dongle Returns, GLOBAL VR, 2350 Zanker Road, San Jose CA 95131

For your convenience, a pre-addressed envelope is included in the kit. (You can also use the envelope to return any other old dongles you may have.)

Run the System Recovery Disk

Note: Be careful not to scrape the CDs as you put them in the tray. Dirt or scratches on the surface of a CD can cause the software installation to fail.

1. Insert the **System Recovery Disk** in the drive and power the cabinet OFF and then ON. When the computer reboots, the CD should run automatically (wait about 30 seconds). You will see messages onscreen as files are copied to the hard drive.
2. After about 5 minutes, when prompted, remove the CD and reboot the computer. **Do not** insert the Game Install disk yet!
3. Wait for about 5—6 minutes while the software finishes the installation and reboots the computer. When the process is complete, you will briefly see a message saying "NASCAR OS Installation is Complete." Proceed to run the Game Install disk.

Note: If you are not sure whether the Operating System installation process is complete, it is OK to insert the Game Install disk. The disk will not run if the Operating System installation is not complete, and you will need to eject it and insert it again once the process finishes.

Run the Game Install Disk

1. With the cabinet powered ON and the computer booted, insert the CD labeled **Game Install**. The CD will automatically run (wait about 30 seconds). The Install Shield Wizard will appear as the software copies files to the hard drive.
2. After about 7—8 minutes, the computer will automatically reboot. A screen will appear saying "There is a CD in the Drive." Remove the CD and press the **START** button to continue. Keep both CDs in a safe place in case you need them in the future.
3. The "Calibrate the Accelerator and Brake" screen will appear. Press each pedal fully to the floor to set the pot limits.
4. Next, the steering will auto calibrate. Do not touch the wheel as it turns to set the pot limits.
5. The Cabinet Link ID resets to **1** when you install the software. If the software detects another linked cabinet with that link ID number, a screen will appear and prompt you to select a different Link ID. If necessary, you can change link IDs from the Operator Menu.
6. Once the Attract Movie begins, play a game to verify proper operation.
7. Open the Operator Menu and set the sound volume levels, pricing, and other Operator settings.

Install the *New Track & Road Course* Sign

Install the *New Track & Road Course* sign from the kit on top of the cabinet to let your players know about the update.
