

<b>Priority Level: Medium — Recommended Action for Affected Systems</b>		
<b>Attention:</b>	All Service Personnel	<b>Bulletin:</b> SB-051 <b>Date:</b> 11/11/2013
<b>Products:</b>	The Swarm 3D with 3D Controller Kit (IR Emitter)	
<b>Issue:</b>	Controller PCB must connect to PCI USB Port on Games with <b>MSI H61M-P32</b> Motherboard	

**Symptom:** The 3.0 USB ports on the **MSI H61M-P32** Motherboard are not supported by the IR Controller PCB. (System Recovery Disks released after October 2013 will correct this issue.) If you connect the PCB to a motherboard USB port, your monitor will not switch into 3D mode.

**Solution:** Connect the IR Controller PCB to the fourth PCI USB port, as shown below.
