

Replacing Tethered Glasses on *The Swarm Games*

Document Part #: 040-0261-01

You can replace the tethered 3D glasses on your *The Swarm*™ cabinet with any RealD™ glasses.

You can also order replacement glasses and tether from our online store: <http://parts.globalvr.com>

Tools and Supplies Required:

- RealD 3D Glasses
- Small Cable Tie
- Drill with Small Bit (About ¼")
- Wire Snips

Do the following to replace the tethered 3D glasses on a cabinet:

1. Snip the cable tie that secures the existing glasses to the tether.
2. View the game through the replacement glasses to verify that they are compatible.
3. Carefully drill a hole through the temple of the glasses, just large enough to fit the cable tie, as shown in the first picture below. The side you drill will depend on whether the glasses are for Player 1 or Player 2.
4. Insert a cable tie through the glasses and tether, as shown in the second picture below. Tighten the cable tie and snip the end.
