Breeders' Cup – Credit Settings for Game Play

During the initial tests, it has been reported that the most optimal settings to maximize earnings potential is to change the factory setting fees from \$2 for career mode to \$1, and upcharge for new cards from \$0 to \$1.

Breeders' Cup – Latest Software Version v1.0.5

A new version of the Breeders' Cup software was released on Friday April 15th. The new software version is v1.0.5 and the updated changes are listed below:

- New Card Printing
- Sire, Dam, Breeding Info
- Race Results on Card
- Descriptions in Horse Selections
- Race Distance Display
- Updated Audio Cues During Career Mode
- Whip Meter Update with Condition Meter and Whip Meter Display
- Improved Jockey Animations
- Remote Data Manager

Please make sure that your Breeders' Cup cabinet is connected to an Internet Broadband Connection so we can automatically update the software for you while they are at the location. UltraCade Technologies requires that all Breeders' Cup cabinets be running the v1.0.5 software release. If the cabinet is not online, we can send a CD updater to update the machine manually.

Visit the Breeders Cup web page at www.ultracade.com/bc to get the latest information about the Breeders' Cup game. You can view the latest Software Release, upcoming Tournament info, Game Play Tips and Hints, and an updated Where to Play list.
